Radiologic Technology Associate Degree Program

Application must be submitted by January 15, 2010

The Radiologic Technologist is the technical assistant to the Radiologist, a Physician who specializes in the use of X-rays and radioactive isotopes. Since X-rays are an important tool for the diagnosis of disease, Radiologic Technologists are valued members of the health team. The Radiologic Technology Program leads to employment as Radiologic Technologists in hospitals, medical offices, clinics, and public health institutions.

The applicant must verify how all prerequisites to the program are completed. It is essential that the student review academic records to be sure all transcripts are in the folder. The NVCC Admissions Office staff will assist you, they can be reached at 203-575-8294.

rev. 2/12/09

New or Transfer Students must submit an NVCC Application along with this Program Application. Current or Former NVCC students need only submit this Program Application.
